

“Gheorghe Asachi” Technical University of Iasi, Romania

First International Symposium

CONTROL AND METROLOGY OF ENVIRONMENTAL QUALITY FACTORS – IS.CMEQF- 01

The International Symposium CMEF-01/2010 gave the opportunity for scientists, researchers, teachers, students and industrial partners to meet and share their experience and interests in the field of the symposium topics.

The symposium participants came from different universities, research centers and companies from Romania and abroad. With this occasion, partnerships, exchange of opinions and good practices were established. The main objective of this symposium was to create the media suitable for the development of market concerning technological and “know how” transfer from academic area into the production and business area. Another objective consisted in the dissemination and promotion of scientific results and technical developments which were achieved within research contracts and grants by the teachers and PhD students. A special attention was focused on the results obtained by the PhD students who are included in the PhD programs, financed from structural funds (BRAIN and EURODOC).

This event was organized together with the Faculty of Chemical Engineering and Environmental Protection, Department of Environmental Engineering, using as motto:

“Stimulation of innovation and the increase of the sensibility level for economical media toward the scientific results, play an important role for competitive technological achievements, in the context of sustainable development.”

The host of this event was the Faculty of Hydrotechnics, Geodesy and Environmental Engineering, where a true culture of creativity has been developed. The faculty is famous for the great number of patents, which were obtained by staff and students. Following the above mentioned direction, this symposium represented a way for affirmation and promotion of technical creativity. It might offer to the economical agents the possibility to apply the scientific results of research, obtained in the frame of “Gheorghe Asachi” Technical University of Iasi.

As a consequence of the large participation of specialists from different domains to this event, a contribution to the national objective of the Romanian Scientific Community has been achieved: their integration in the international scientific community and the visibility enhancement of their contribution to the international scientific patrimony.
